

Ground pole

Installation of earthing

Ground pole for current leakage, made of galvanized steel with high resistance to wear and corrosion. The solid structure ensures a reliable **anchorage for the grounding system**, helping to protect electrical systems from overloads or discharges.

The Kapriol earthing pole is available in **100 or 150 cm length**.

TECHNICAL SPECIFICATIONS

- galvanized finish
- length 100 - 150 cm

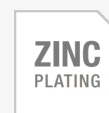

MATERIAL

- Structure: galvanized steel

Materials

Steel

Zinc Plating
