Grigio

The safety shoes Dune Micro Sock are part of the new [line of work shoes Dune - Ultra Rebound Technology](#), equipped with an innovative midsole with cushioning and movement return effect, which guarantees softness, flexibility and elasticity. Thanks to the midsole made with the special NHP (Nylon High Performances) compound composed of EVA, with the specific function of cushioning impacts on the foot, the work shoes Dune are particularly comfortable and performing. At the same time reducing the possibility of damage to joints and muscles.

The safety shoes Dune Micro Sock are characterized by the particular "sock" fit that wraps the foot like a sock, giving greater comfort and protection from entering dust and small debris in the shoe. In addition to the innovative microfiber upper that offers both strength and comfort given by the ability of the fabric to adapt to the shape of the foot. The pronounced carving of the sole and the appropriate drains facilitate the escape of mud, ensuring a clean and adherent to the ground.
