2026

Kapriol®

A vibrant, high-angle photograph of a lush green landscape. A large, leafy tree dominates the right side of the frame, its branches spreading across the top. The ground is covered in dense, bright green vegetation, possibly a field of wildflowers or a meadow. In the lower right corner, a person's arm and hand are visible, holding a small object, possibly a tool or a piece of equipment. The overall scene is bright and sunny, with a clear focus on the natural environment.

KAPRIOL INCONTRA TREEDOM®: LA SEMINA DI UNA PICCOLA RIVOLUZIONE / KAPRIOL MEETS TREEDOM®: SOWING THE SEEDS OF A SMALL REVOLUTION / KAPRIOL ET TREEDOM® : LES SEMENCES D'UNE PETITE RÉVOLUTION

Kapriol ha scelto Treedom® per una collaborazione che avesse come obiettivo costruire un mondo più sostenibile. Ed è nata la foresta Gaia: sono attualmente 800 gli alberi piantati in Camrun, Colombia, Ecuador, Guatemala, Kenya, Madagascar, Malawi e Tanzania, ma non ci fermeremo qui, la foresta crescerà nel tempo.

Quali frutti porterà la foresta Gaia? Innanzitutto con i primi alberi piantati assorbirà 246 tonnellate di CO² presenti nell'atmosfera e poi darà anche sostegno alle comunità locali attraverso la creazione di posti di lavoro e la produzione di cibo con cui nutrirle. La coesione tra i due ecosistemi, quello ambientale e quello sociale, contribuirà a dare vita nel tempo a un circolo virtuoso di sostenibilità

Kapriol has chosen Treedom® for a collaboration aimed at building a more sustainable world. And the Gaia forest is born: 800 trees are currently planted in Camrun, Colombia, Ecuador, Guatemala, Kenya, Madagascar, Malawi, and Tanzania, but we will not stop here; the forest will grow over time.

What fruits will the Gaia forest bear? First of all, with the first trees planted, it will absorb 246 tons of CO² in the atmosphere, and then it will also support local communities by creating jobs and producing food to feed them. The cohesion between the two ecosystems, the environmental and the social, will over time contribute to a virtuous circle of sustainability.

Kapriol a choisi Treedom® pour une collaboration visant à construire un monde plus durable. Et la forêt Gaia est née : actuellement, 800 arbres ont été plantés au Cameroun, en Colombie, en Équateur, au Guatemala, au Kenya, à Madagascar, au Malawi et en Tanzanie, mais nous ne nous arrêterons pas là.

Quels fruits portera la forêt Gaia ? Tout d'abord, avec les premiers arbres plantés, elle absorbera 246 tonnes de CO² dans l'atmosphère, puis elle soutiendra également les communautés locales en créant des emplois et en produisant des aliments pour les nourrir. La cohésion entre les deux écosystèmes, l'environnemental et le social, contribuera au fil du temps à un cercle vertueux de durabilité.

KAPRIOL / OEKO-TEX®: A SAFETY
SIGN ON KAPRIOL CLOTHING / OEKO-
TEX® : UN SIGNAL DE SÉCURITÉ SUR
LES VÊTEMENTS KAPRIOL**

Kapriol ha a cuore la sicurezza dei propri clienti ed è per questo che si affida ad OEKO-TEX® per garantire l'innocuità dei propri capi di abbigliamento, verificando che non siano presenti sostanze dannose per la pelle o per la salute di chi li indossa.

OEKO-TEX® è uno standard unico di certificazione e controllo nel settore delle materie prime tessili e dei prodotti finiti, che contrassegna i prodotti che non presentano rischi per la salute dei consumatori e danni per l'ambiente. Non è semplice superare i severi criteri imposti da OEKO-TEX®, tutto viene ispezionato e certificato per la cosa che ci sta più a cuore: la sicurezza del nostro cliente

Kapriol cares about the safety of its customers, which is why it relies on OEKO-TEX® to guarantee the safety of its garments by checking that no substances harmful to the skin or health of the wearer are present.

OEKO-TEX® is a unique certification and inspection standard in the field of textile raw materials and finished products, which marks products that pose no health risks to consumers and no harm to the environment. It is not easy to pass the strict criteria set by OEKO-TEX®, everything is inspected and certified for what we care about the most: the safety of our customers.

Kapriol se soucie de la sécurité de ses clients, c'est pourquoi elle s'appuie sur OEKO-TEX® pour garantir la sécurité de ses vêtements en vérifiant l'absence de substances nocives pour la peau ou la santé de l'utilisateur.

OEKO-TEX® est une norme de certification et d'inspection unique dans le domaine des matières premières textiles et des produits finis, qui marque les produits ne présentant aucun risque pour la santé des consommateurs et ne nuisant pas à l'environnement. Il n'est pas facile de satisfaire aux critères stricts fixés par OEKO-TEX®, tout est inspecté et certifié pour ce qui nous tient le plus à cœur : la sécurité de nos clients.

PAS VERS LA DURABILITÉ

I capi contraddistinti dall'etichetta KAPRIOL RECYCLED FABRIC rappresentano il primo approccio di Kapriol verso la produzione sostenibile di indumenti prodotti con tessuti realizzati con materiali da riciclo. Il riciclo è importante per lo sviluppo di un modello di produzione e consumo sostenibile con l'obiettivo di favorire la riduzione del consumo di risorse

The garments bearing the KAPRIOL RECYCLED FABRIC label represent Kapriol's first approach to the sustainable production of garments made with fabrics from recycled materials. Recycling is important for the development of a sustainable production and consumption model with the aim of favouring the reduction of resource consumption.

Les vêtements portant l'étiquette KAPRIOL RECYCLED FABRIC représentent la première approche de Kapriol en matière de production durable de vêtements fabriqués avec des tissus provenant de matériaux recyclés. Le recyclage est important pour le développement d'un modèle de production et de consommation durable visant à favoriser la réduction de la consommation de ressources.

SUOLA / SOLE / SEMELLE

PRESTAZIONI D'ECCELLENZA PER SCARPE SENZA CONFRONTO.

EXCELLENT PERFORMANCES FOR PEERLESS SHOES.

PRESTATIONS D'EXCELLENCE POUR DES CHAUSSURES UNIQUES.

SUOLA ANTISTATICA

Calzature marcate S1-S2-S3 possiedono proprietà antistatiche. Permettono il passaggio di correnti a basso voltaggio, scaricando così le scariche elettrostatiche accumulate dall'operatore.

ANTISTATIC SOLE

Work shoes marked S1-S2-S3 have anti-static properties. They permit low voltage current passage, thus discharging the electrostatic loads accumulated by the operator.

SEMELLE ANTISTATIQUE

Les chaussures de travail marquées S1-S2-S3 possèdent des propriétés antistatiques. Elles permettent le passage de courants de faible voltage en déchargeant les charges électrostatiques accumulées par l'opérateur.

TOMAIA RESISTENTE ALL'ACQUA

Grazie ad uno speciale trattamento la tomaia è impermeabile all'acqua. Test eseguito con immersione della calzatura in un bagno d'acqua dopo aver introdotto aria compressa. L'assenza di bolle d'aria indica la tenuta all'acqua della tomaia.

WATER-RESISTANT UPPER

Thanks to a special treatment the uppers are waterproof. The test is performed by sealing the shoe and by immersing it in a water bath after introducing compressed air. Lack of air bubbles indicates that the upper is waterproof.

TIGE RÉSISTANTE À L'EAU

Grâce à un traitement special la tige est imperméable à l'eau. L'essai est effectué en isolant la chaussure et en la plongeant dans un bain d'eau après y avoir introduit de l'air comprimé. L'absence de bulles d'air indique que la tige est imperméable à l'eau.

SCARPA RESISTENTE ALL'ACQUA

Scarpe dotate di membrana impermeabile che blocca la penetrazione dell'acqua. Test eseguito con immersione totale della calzatura nell'acqua. Alla fine del test la superficie bagnata all'interno deve essere < 3 cm².

WATER RESISTANT SHOES

Shoes equipped with waterproof membrane that blocks the water penetration. The test is performed with the sailing of the total shoe into the water. At the end the wet surface must be < 3cm².

CHAUSSURE RÉSISTANTE À L'EAU

Chaussures munies d'une membrane imperméable qui bloque la pénétration de l'eau. L'essai est effectué avec immersion totale de la chaussure dans l'eau. A la fin de l'essai la surface humide à l'intérieur doit être < 3 cm².

SUOLA RESISTENTE AGLI OLII

Suole che respingono e non assorbono sostanze oleose mantenendo invariate caratteristiche e prestazioni. Test eseguito con immersione nel Trimetipentano. Il volume non deve aumentare oltre il 12%.

OIL-RESISTANT SOLE

Soles that repel and do not absorb oily substances, and maintain their characteristics and performances. The test is performed by an immersion in Trimethylpentane. The volume must not increase more than 12%.

SEMELLE RÉSISTANTE AUX HUILES

Semelles qui repoussent et n'absorbent pas substances huileuses en gardant inchangées leurs caractéristiques et performances. L'essai prévoit l'immersion dans Triméthylpentane. Le volume ne doit pas excéder le 12%.

SUOLA RESISTENTE AL CALORE

Suole resistenti al calore per contatto. Il test prevede il contatto con superficie a 300°C per 60 sec. senza danni conseguenti visibili.

HEAT-RESISTANT SOLE

Soles that are resistant to heat contact. The test involves contact with a hot surface of 300°C for 60 seconds. without visible damages.

SEMELLE RÉSISTANTE À LA CHALEUR

Semelles résistantes à la chaleur par contact. L'essai prévoit le contact avec une surface à 300°C pendant 60 secondes, sans aucun dommage.

SUOLA ISOLANTE DAL FREDDO

Scarpe con soles isolanti dal freddo. Sottoposte a test specifico a -17° con verifica che la temperatura della superficie interna non risulti inferiore agli standard richiesti. Specifiche per lavori all'esterno con esposizione ad agenti atmosferici a bassa temperatura.

COLD INSULATING SOLE

Shoes with insulating soles against the cold. Subjected to a specific test at -17 ° with verification that the temperature of the internal surface is not lower than the required standards. Specific for outdoor work with exposure to atmospheric agents at low temperature.

SEMELLE ISOLANTE DU FROID

Chaussures à semelles isolantes du froid. Soumises à un test spécifique à -17 ° C, avec vérification que la température de la surface interne n'est pas inférieure aux normes requises. Spécifiques pour les travaux extérieurs avec exposition aux agents atmosphériques à basse température.

ESD - ELECTROSTATIC DISCHARGE

Scarpe che scaricano costantemente al suolo l'elettricità statica accumulata dal corpo umano proteggendo anche gli apparecchi sensibili alle scariche elettrostatiche.

ESD - ELECTROSTATIC DISCHARGE

Shoes that constantly discharge the static electricity accumulated by the human body to the ground, also protecting devices that are sensitive to electrostatic discharge.

ESD - ELECTROSTATIC DISCHARGE

Une chaussure qui décharge constamment l'électricité statique accumulée par le corps humain sur le sol, en protégeant également les appareils sensibles aux décharges électrostatiques.

METAL FREE

Scarpa totalmente costruita senza parti metalliche.

METAL FREE

Shoe totally designed without metal parts.

SANS MÉTAL

Chaussure totalement construite sans pièces métalliques.

*Con Kapriol solo il meglio, ogni giorno!
A good daily habit!
De bonnes habitudes quotidiennes!*

CURA E MANUTENZIONE ALLUNGANO LA VITA DELLE TUE SCARPE KAPRIOL.

IT

Le scarpe di sicurezza usate durante la quotidiana attività lavorativa devono essere considerate come degli accessori tecnici a tutti gli effetti. È quindi indispensabile dedicare attenzione alla cura e alla pulizia delle scarpe, considerando che esse vengono utilizzate più di 8 ore al giorno, per almeno 5 giorni lavorativi alla settimana. Una scarpa da lavoro dura in media 5-6 mesi. Non effettuando alcuna operazione di cura/manutenzione, tale arco temporale potrebbe ridursi sensibilmente. Al contrario, una corretta e costante opera di pulizia allunga la vita della calzatura, accrescendo al tempo stesso il comfort per chi la utilizza. Al termine della giornata lavorativa, o almeno una volta alla settimana, si consiglia vivamente di effettuare le seguenti operazioni:

- Rimuovere sporco e fango dalla tomaia con acqua tiepida e sapone neutro, usando uno

straccio umido o una semplice spazzola

- Rimuovere sempre il sottopiede dalla calzatura, lavarlo e farlo asciugare come fatto per la tomaia
- Lasciare asciugare la scarpa a temperatura ambiente possibilmente in luogo ventilato, facendo attenzione a non posizionarla vicino a fonti di calore artificiali quali stufe, luce diretta del sole, per evitare screpolature e rotture dei pellami naturali.
- Una volta asciugata, la tomaia può essere trattata con uno spray idrorepellente per garantire la protezione dallo sporco e dall'umidità. Nel caso di calzature in pelle sintetica, è sufficiente applicare una schiuma leggera per la pulizia: tale materiale, infatti, non è adatto ad essere trattato con spray idrorepellenti, che provocherebbero solo uno strato appiccicoso in superficie.

CARE AND MAINTENANCE PROLONG LIFE.

EN

Safety shoes worn daily during work must be considered as technical accessories for all intents and purposes. It is thus essential to dedicate attention to caring for and cleaning shoes, considering that they are used for more than 8 hours a day, at least 5 days a week. On average, a work shoe lasts 5-6 months. Without care/maintenance, this time period could be significantly reduced. Contrarily, correct and constant cleaning extends shoe life, also improving the user's comfort. At the end of the work day, or at least once a week, we highly recommend you perform the following operations:

- Remove dirt and mud from the upper with warm water and neutral soap, using a damp

cloth or simple brush

- Always remove the insole from the shoe, wash it and dry it as done for the upper
- Let the shoe dry at room temperature, possibly in a ventilated area, being careful not to place it too close to artificial heat sources such as stoves, direct sunlight, to prevent the natural leather from wrinkling and breaking
- Once dry, the upper can be treated with waterproofing spray to guarantee protection against dirt and humidity. For synthetic leather shoes, simply apply a light foam to clean: in fact, this material is not suited for waterproofing spray treatment which would only create a sticky film on the surface

SOIN ET ENTRETIEN ALLONGENT LA VIE.

FR

Les chaussures de sécurité utilisées durant l'activité de travail quotidien doivent être considérées comme des accessoires techniques à tous les effets. Il est donc indispensable de bien entretenir les chaussures compte tenu du fait qu'elles sont utilisées plus de 8 heures par jours et 5 jours par semaine. Une chaussure de travail dure en moyenne 5-6 mois. Si aucune opération d'entretien/soin n'est effectuée, ce délai de temps pourrait sensiblement se réduire. En revanche, un bon entretien des chaussures allonge leur durée de vie et accroît en même temps le confort de ceux qui les portent. À la fin d'une journée de travail, ou au moins une fois par semaine, on conseille vivement d'effectuer les opérations suivantes:

- Enlever la saleté et la boue de la tige avec de l'eau tiède et du savon neutre à l'aide d'un

chiffon humide ou une simple brosse

- Toujours enlever la première des chaussures, la laver et la faire sécher comme pour la tige
- Laisser sécher les chaussures à température ambiante, si possible dans un endroit aéré, en veillant à ne pas les positionner près de sources de chaleur artificielles (telles que les poêles) et à la lumière directe du soleil, afin d'empêcher que les peaux naturelles ne se craquèlent ou ne se cassent.
- Une fois séchée, la tige peut être traitée avec un spray hydrofuge pour garantir la protection contre la saleté et l'humidité. Pour les chaussures en peau synthétique, il suffit d'appliquer une mousse d'entretien légère : les peaux synthétiques ne doivent en effet pas être traitées avec des spray hydrofuges car cela ne ferait que provoquer une couche poisseuse sur la surface.

VESTIBILITÀ / FITTING / PORTABILITÀ

SLIM FIT

Nella versione SLIM FIT la gamba è tenuta più aderente al corpo, riducendo la larghezza del ginocchio e del fondo e contenendo la lunghezza per ottenere un'aspetto più sagomato. Rimane l'ottima libertà dei movimenti grazie alla sagomatura del cavallo e delle ginocchia.

In the SLIM FIT version, the leg is more form-fitting, reducing the width of the knee and cuff and limiting the length to obtain a more shapely look. Excellent freedom of movement is still guaranteed thanks to the shape of the crotch and knee.

Dans la version SLIM FIT, la jambe adhère davantage au corps, en réduisant la largeur du genou et du bas et contenant la longueur pour obtenir un aspect plus façonné. Les mouvements sont libres grâce au façonnage du cheval et des genoux.

REGULAR FIT

La versione REGULAR FIT è la vestibilità standard Kapriol, adatta ad ogni tipo di utilizzo. La calzata è piacevole, il cavallo sagomato impedisce l'abbassamento del pantalone nei piegamenti, il maggiore spazio sulla gamba favorisce la massima libertà.

The REGULAR FIT version is the standard Kapriol fit, suited for every type of use. The fit is pleasant, the shaped crotch prevents pants from lowering when bending and the large space on the leg promotes maximum freedom.

La version REGULAR FIT est la portabilité standard Kapriol, adaptée à chaque type d'utilisation. La portabilité est confortable, le cheval façonné empêche l'abaissement du pantalon au moment où on se penche, le fait d'avoir plus d'espace sur la jambe favorise la plus grande liberté de mouvement.

RELAXED FIT

Nella versione RELAXED FIT viene dato maggiore volume a bacino, coscia, ginocchia e fondo, ottenendo una gamba più dritta, adatta ai lavori che richiedono il massimo dei movimenti. Grazie alla migliore ventilazione, è anche particolarmente indicata per la stagione estiva.

In the RELAXED FIT version, higher volume is given to the hips, thighs, knee and cuff to obtain a straighter leg, suited for work that requires maximum movement. Thanks to the improved ventilation, it is also especially indicated for summer.

Dans la version RELAXED FIT, on donne plus de volume au bassin, à la cuisse, aux genoux et au bas, obtenant une jambe plus droite, adaptée aux travaux qui exigent le maximum de mouvements. Grâce à une meilleure aération, cette version est particulièrement indiquée pour l'été.

VESTIBILITÀ, MATERIALI E DETTAGLI PER PERFORMANCES D'ECCELLENZA.

FIT, MATERIALS AND DETAILS FOR EXCELLENT PERFORMANCE.

PORTABILITÉ, MATÉRIAUX ET DÉTAILS POUR DES PERFORMANCES EXCELLENTES.

TRASPIRABILITÀ

Il capo indossato a contatto pelle (Underwear) è la base del sistema dell'abbigliamento a strati, da cui dipende l'efficacia della trasmissione del vapore generato dalla sudorazione verso l'esterno, limitando la sensazione di umidità sul corpo e la condensa all'interno degli indumenti.

BREATHABILITY

The garment worn in contact with the skin (underwear) is the foundation of the layered clothing system, on which the outward transmission efficiency of the vapour generated by perspiration depends, limiting the feeling of dampness and condensation inside clothing.

RESPIRABILITÉ

Les sous-vêtements (Underwear) sont la base du système de l'habillement par couches dont dépend l'efficacité de la transmission de la vapeur produite par la transpiration vers l'extérieur, limitant la sensation d'humidité sur le corps et la condensation à l'intérieur des vêtements.

ISOLAMENTO TERMICO

Utilizzo di materiali ad alto potere isolante, comprimibili per ridurre l'ingombro e garantire libertà di movimento. Attenzione ai dettagli: colli e cappucci imbottiti, fodere in fleece, patelette sotto le zip centrali, regolazioni con coulisse.

THERMAL INSULATION

Made with materials with high insulating power, compressible to reduce volume and avoid hindering movement. Attention to the details: padded neck or hood, fleece lining, flap under the central zipper, drawstring adjustments.

ISOLATION THERMIQUE

Construit avec des matériaux à haute pouvoir isolant, compressibles pour réduire l'encombrement et éviter de limiter les mouvements. Attention aux détails: col ou capuche matelassés, doublures en polaire, rabat sous les zip centrales, réglage à coulisse.

COMFORTABLE

la tecnologia dei materiali e la vestibilità dei capi garantiscono un'ottima libertà di movimento e un elevato comfort

COMFORTABLE

the technology of the materials and the wearability of the garments guarantee excellent freedom of movement and high comfort

COMFORTABLE

la technologie des matériaux et la portabilité des vêtements garantissent une excellente liberté de mouvement et un grand confort

HIGH DURABILITY

la costruzione del capo e la tipologia dei tessuti utilizzati, che resistono a lavaggi ad alte temperature, garantiscono lunga durata

HIGH DURABILITY

the construction of the garment and the type of fabrics used, which resist washings at high temperatures, guarantee long life

HIGH DURABILITY

la construction du vêtement et le type de tissus utilisés, qui résistent aux lavages à hautes températures, garantissent une longue durée de vie

UPF 50+

Fattore di protezione UPF 50+ protegge la pelle da una prolungata esposizione ai raggi solari

UPF 50+

UPF 50+ protection factor, protects the skin from a prolonged exposure to sunlight.

UPF 50+

Facteur de protection UPF 50+, protège la peau d'une exposition prolongée au soleil

IDROREPELLENZA

Finissaggio all'esterno del tessuto per far scivolare l'acqua in superficie.

WATER REPELLENT

Outside fabric finishing to make the water slide on the surface.

HYDROFUGE

Finissage à l'extérieur du tissu pour faire glisser l'eau sur la surface.

RESISTENZA ALL'ACQUA

Finissaggi impermeabili e traspiranti all'interno del tessuto e finissaggio "water repellent" all'esterno. Capi con cappuccio e polsini regolabili, cerniere impermeabili, patelette, cuciture termonastrate.

WATER RESISTANCE

Waterproof and breathable finishings on the reverse side and external "water repellent" finishing. Garments with adjustable hood and cuffs, waterproof zipper, flaps, seams covered by tape.

RÉSISTANCE À L'EAU

Finissages à revers imperméables et transpirantes et finissage "water repellent" extérieur. Vêtements avec capuche e polsini réglables, fermetures imperméables, rabats, coutures recouvertes d'une bande sur le reverse.

RESISTENZA ALL'USURA

Tessuti in grado di resistere all'esposizione prolungata a polvere, sfregamenti, lavaggi. Cuciture rinforzate e applicazioni di protezione.

WEAR RESISTANCE

Fabrics able to resist prolonged exposure to dust, abrasion and washing. Reinforced seams and protective applications.

RÉSISTANCE À L'USURE

Tissus et accessoires en mesure de résister à l'exposition prolongée à la poussière, aux frottements et aux lavages.

RESISTENZA AL VENTO

Tessuti ad alta densità per contrastare la penetrazione del vento, spesso combinati con spalmatura di protezione. Capi con cappucci e polsi regolabili, collo alto e regolazione al fondo.

WIND RESISTANCE

High density fabrics to fight wind penetration, often combined with a protective coating. Garments with adjustable hood and cuffs, high collar and adjustment at the bottom.

RÉSISTANCE AU VENT

Haute densité des files pour combattre la pénétration du vent, souvent assortie de l'application d'une enduction. Vêtements avec capuche e polsini réglables, col montant, réglage de l'ourlet au bas.

THERMIC

Abbigliamento elasticizzato dalle forme avvolgenti. Si adatta perfettamente all'anatomia del corpo facilitando i movimenti. Ottimizza la traspirazione lasciando la pelle asciutta e alla temperatura ottimale. L'assenza di cuciture assicura comfort senza costrizione.

Stretch clothing with wraparound shapes. It fits perfectly to the body and guarantees ease of movement. Optimizes breathability leaving dry skin and at the right temperature. The absence of seams ensures high comfort without constraint.

Vêtements élastiques avec des formes enveloppantes. Ils s'adaptent parfaitement à l'anatomie du corps en facilitant les mouvements. Favorise la respirabilité en laissant la peau sèche et à la température idéale. L'absence de coutures assure un confort sans constrictions.
